UNIVERSITY OF CALIFORNIA, LOS ANGELES
EVALUATION OF INSTRUCTION PROGRAM
CLASS HEADER

INSTRUCTOR NAME: JEWITT, D.C.
YEAR: 2013 SPRING
COURSE: E&S SCI 0015
SECTION: 001
ENROLLMENT: 360
He made the course material very interesting and fun to learn about. He also presented the information in a way that made it easy to understand. Great Professor. No Complaints.

NOTE: Each year, the Academic Senate Committee on Teaching gives awards to outstanding faculty and teaching assistants. If you wish to nominate an instructor or teaching assistant for such an award, please contact the instructor's department.

THANK YOU. Your assistance in improving teaching is appreciated.
Professor Jen is one of the best, most interesting, most effective, and great lecturers I have heard at UCLA. We need more professors like him at UCLA.
Professor Jewitt did a great job teaching this course. Since it is a G.E. course, and most of us students aren't science majors, he made the class very interesting and entertaining. Aside from lack of interest in the subject matter, this was a great course and I'm glad I took it. No major weaknesses.
- Great professor!
- Makes the material easy to understand
- Easy to pay attention during lectures because the professor has videos during lecture powerpoints which are funny & helpful!

NOTE: Each year, the Academic Senate Committee on Teaching gives awards to outstanding faculty and teaching assistants. If you wish to nominate an instructor or teaching assistant for such an award, please contact the instructor’s department.

THANK YOU. Your assistance in improving teaching is appreciated.
You're an amazing professor, one of my favorite so far. The lecture covers a broad range of material so it's very hard to be bored. I like the way the extra credit assignments allow us to have hands-on experience on what we learned in lecture. The videos in class are funny and a great addition to the lectures.

NOTE: Each year, the Academic Senate Committee on Teaching gives awards to outstanding faculty and teaching assistants. If you wish to nominate an instructor or teaching assistant for such an award, please contact the instructor's department.

THANK YOU. Your assistance in improving teaching is appreciated.
I love professor Jewitt's sense of humor b/c it makes the lectures more interesting.

NOTE: Each year, the Academic Senate Committee on Teaching gives awards to outstanding faculty and teaching assistants. If you wish to nominate an instructor or teaching assistant for such an award, please contact the instructor's department.

THANK YOU. Your assistance in improving teaching is appreciated.
Subject matter and focus on general scientific themes were enlightening. Tests did not measure mastery of class themes, just random fact memorization.

Funniest prof. ever!

Would have preferred a range of diff q. types on midterms / longer papers.
Prof. Jewitt, this is my second class with you (Essq was 1st) & I enjoy coming to your lectures. You're a great lecturer. You know what you're talking about and that's great.
Very interesting class and Professor. Prof. Jewitt made it apparent early that he knew what he was talking about and had a passion for teaching the course.

Enjoyed that the class was extended from the classroom to outside activities.
Instructor was well-prepared w/ lecture presentations & expanded a lot on course material and engaged students by presenting material in an easy to understand and interesting way (via videos). Exams were fair & lectures prepared students well.
Professor Jewitt is overall awesome. He is supremely proficient in all the material we discussed. I liked the video in lecture. They kept us entertained.

The multiple choice wording and questions on the examinations were a bit difficult and tricky.

I often knew the answer but got it wrong due to tricky wording.

The course was interesting due to the professor's clear knowledge of the subject. The material was nicely introduced and was made very interesting.

I didn't think the exam questions tested the material effectively. The first midterm had a lot of questions that required memorizing one line amidst the hundreds of slides. The labs were interesting and so were the lectures.

- enjoyed going to lecture
- exams were harder than expected

Amazing professor! This is my second time taking this GE? I really enjoyed it this time. The visuals were really good & helpful. I was extremely surprised to find out that this was his first time teaching this class & the extra credits he gave us were super fun & we actually learned.

Overall, A+! Amazing!

No weaknesses.
I appreciated how good-natured and humorous the instructor appeared to be. He made the class enjoyable. I can't find any real weakness with the instructor or the course, for that matter.

Overall good class and professor. Exams were more tricky than I expected, but I also hate multiple choice exams.
This course led me to get interested in the ocean and other related things. It was such a great chance for me to study about the ocean. I enjoyed it!

Also, Professor David is such a great professor!

- Great professor, made me want to come to class
- Material was interesting
- First midterm seemed tricky, really had to have memorized it all into
- Was helpful to do extra credit opportunities but they required a lot of driving

Professor Jewitt was great!

As was the course!

The only qualm I had with it was that the tests were so numerically detailed—I had thought the course was about the broader concepts of Oceanography and less about tiny tiny details, so I did terribly studying for Exam 1, and just ok on Exam 2.

The lectures were wonderful though! Really great to learn these things—especially about ocean life.

Thank you!
The strengths of Professor David Jewitt is that he knows the material really well, he has a great sense of humor which makes the class fun and enjoyable while learning at the same time. I like how he doesn't read from the slides, he is very well prepared and instead explains things in his own words while still including the needed vocab to understand the course fully. He is one of the best professors I've had so far at UCLA. He cares about our learning and not just testing just memorization. There is no really weaknesses other than I just don't like how in lab we go over things that either we went over a week or two ago or haven't gone over, we rarely go over the same things in lectures and lab sections during the same week.
D. Jevre is a master professor. He is so knowledgeable and fun and just a pleasure to learn from.
Since you like comments, I can write some.

It's amazing how much information you know and how easily you recall the info during lecture. Personally it was hard for me to take in & remember all the interesting facts, but listening to lectures was quite enjoyable. I feel that I took in & retained quite a bit of knowledge from this class. It was incredibly interesting, and I regret not having enough time to dedicate to this course.

Great class though, and great professor.

Weaknesses: none! Great professor!
Midterms very technical (numerically)

Strengths: excellent teaching strategies, engaging interactive powerpoints, goes the extra mile to interest the students in the material, and he is very prompt w/ CCLE postings.

I plan to take another course w/ prof. Gewirtz!!!

The instructor walks around the room to help students stay focused during lectures. He also keeps us interested and makes it fun for us to listen to the lecture. He makes everything available to us outside of lectures so that we can study or catch up on material.
This instructor communicates clearly, effectively, and perfectly humorously. He selected information to teach which he thought was valuable and interesting, rather than teaching boringly from a textbook. Use of videos in class furthered understanding and interest. Thanks! Because of this class, I am now scared to go to the ocean. I have no idea what I might run into when in the water. Before this class I didn't realize of all the dangers at the beach, but the great lectures helped me understand of the "wonders" of the ocean. Your lectures were great and signing up for this class I didn't know what to expect, but I enjoyed taking the course.

Dear Professor Jewitt,

Thank you so much for offering a truly wonderful class.
I used to hate oceanography (because it was so boring when I first learned it in middle school), but you made this material so interesting. It was my privilege to take your class. Again, thank you so much. I hope to see you in another class (ESS 97)?!

Jewett was an amazing professor. His lectures were funny, interactive, and very intriguing. He strived to keep this class running smoothly and to captivate our attention. I really enjoyed lectures with all the fun pictures and videos. Labs were often times tiring and lengthy. The T.A. seemed careless and often times the assignments were confusing. Overall, however, I enjoyed the class and would recommend it to anyone. It was a pleasure.

Professor Jewitt made oceanography very fun and interesting. He is very knowledgeable and humorous. He was very concerned about his students and was always available to answer any questions. Although this was a new course, he chose very interesting topics to cover. Overall, Professor Jewitt is an amazing professor who made this class enjoyable for all of his students.

This course was really interesting and has piqued my interest in the science of the oceans. I came in not knowing much of what was taught and learning this material was great fun. I personally thought you were a really great professor! I love that you emphasize the learning aspect of the class over the concern about grades, and I really wish other professors had your ideology too. You make lectures very enjoyable (I especially love the videos). And you have a very great sense of humor :) I've had many laughs. Your tests are really easy but ironically really easy to do poorly on because there are so few questions and many of them are very specific. I would recommend maybe putting more questions on the exams so there is room for error to still get an A grade. Thank you for all the extra credit opportunities as well. You are a fantastic professor and I have truly learned a lot! More you! 😊
Best G.E. ever, looking forward to taking more ESS courses! I wish the midterms had focused more on concepts than trivia, but they're only 10% each so who cares!

I really liked the whale lecture. Here's a whale:

Oceanography is neat!

Plate tectonics were super cool too.

And tides. (we talked about tidal forces in my physics class and it was awesome!)
The class was very interesting and the professor was good. I enjoyed all of the extra credit opportunities to see how the class related to the real world, and seeing different beaches and guanacos.

Professor Jewitt has cool, interactive slides that are both educational and entertaining. I enjoyed attending lectures because of this. I also really enjoyed all the extra credit assignments, and I love how the emphasis is not on grades but rather on learning and having fun. Thank you to opening my eyes to grunion runs and 'Point Dume!' The only weakness I can point out is that sometimes Professor Jewitt speaks condescendingly to class, but that is all.

Mr. Jewitt conveyed his love of science and love of looking at the world and its processes with wonder, delight and enthusiasm.

Every lecture has been interesting, entertaining, meaningful and surprising.

The 3 extra credit assignments were as stated above.

I have so much more respect, interest and knowledge for the world ocean and our blue planet.

Thank you.

Prof. Jewitt was very funny, relatable, and he definitely sparked an interest in me in Oceanography. I actually enjoyed lectures and found much of what he taught us fascinating. I’ve lived next to the ocean my whole life, but until now I knew very little about it. I came up to him after class and asked questions and he was always welcoming/comfortable — he also obviously knew his field well! Thank you so much Dave!

P.S. Watch the movie “The Impossible” about the Tsunami in Thailand!

I thoroughly enjoyed the extra credit assignments and course material.

That being said, I did not feel as welcome as I expected by the Professor. I have had classes where I have been able to talk to the professor for extended periods of time yet when talking to Professor Jewitt I felt rushed to finish and leave him alone. At times he talked down to the class.

I think you are one of the most entertaining professors I've had at UCLA. You know how to keep students awake in lecture, and I feel like that is a difficult task to do in a science GE.

The course was very engaging and interesting.

Maybe just more structure when giving midterms.
I appreciated that you tried not to place too much focus on the exams, but rather on the material in general. However, I do feel that the midterms had a lot of questions where difficulty lied in the precise wording of the questions and answers, rather than knowing the material itself.

Overall, good class, glad I took it.
I was frequently dismayed by the lack of courtesy displayed by my fellow students, especially the loud talking during class. Perhaps the presence of the TAs during lecture may have ensured a more courteous experience.

I was frustrated by some of the test questions. The "both a & c" types of options provided seemed (occasionally) unfair.
The extra credit about the grunions and the waves were great! I learned so many interesting things in the lectures & the lab. This is one of the best (if not the best) class I've ever taken!

Hi, thanks for an awesome quarter.
The lectures were very interesting and I learned a lot from the discussions too.
Incorporation of videos was a major strength.
Well structured class.
Covered many different topics of oceanography. Learned a lot in the process.
Fantastic course!
I love Jewett!
He's so into what he teaches
and the material is really interesting.

His enthusiasm in class is great. He adds some jokes so class is pretty fun to go to.

On exams there are some weird questions.

Overall, it was a fun class and I learned stuff to be interesting.

The extra credits were good. It motivated us to explore the topics we were covering.
- Best professor I've had so far at UCLA
- Very passionate about the subject, kept lectures very interesting, lectures + slides weren't boring but filled with awesome videos.
- Funny, kind, easy to approach, professor and TAs
- Class was taught very well
- Extra credit opportunities were awesome!
- No complaints about this class
- Kevin Koffey is the coolest TA ever! Always willing to help.
- Only thing is the exam midterms were a little tricky and very specific.

I have taken Planets i the solar system and Oceanography with Professor Jewitt. These two classes have been some of my favorite at UCR. The extra credit assignments have been fun and memorable. Keep up the good work!

Excellent Professor!
very interesting. I loved the videos & his presentations. Very entertaining class. I feel as though the exams were not necessarily fair since I came to every class & memorized every slide & yet there were questions on the exams that were not in any of the notes online or from class. Otherwise the professor is great & very well qualified.

I really liked that the instructor gave everyone the ability to do well with extra credit assignments that forced us to go see the ocean ourselves. This was actually my favorite part about the class because it allowed me to explore the ocean and surrounding areas myself rather than only listening in class.

Weaknesses include the professor not having mastered previous knowledge about the Oceanography topics but he lectured on them well. The classes were interesting yet informational. My interest in oceanography has increased since taking this class.

He is a great professor. I loved his lectures. The material was very interesting and I like how he kept me engaged through the videos he would use to demonstrate a concept. He is by far the most entertaining lecturer I've had at UCLA. Class was never dull.
Prof. Jewitt made class really interesting and fun. I did not expect to enjoy the class as much as I did. Everything was fair and his teaching style was excellent. I learned more from this class than I expected to.

Instructor was amazing! No complaints whatsoever—he was very knowledgeable about the material and was never boring during class. Extra credit and homework expanded upon the lectures and were great fun!
